

NEW BOATS

The latest instalment in the fast-growing Neel trimarans line, the Neel 65 Evolution is a truly spectacular new yacht, offering many of those same features that put its award-winning predecessors on the map. Among these are Neel's "cocklooon" (in which the cockpit and saloon successfully blend into one) and the same slippery, wave-piercing hulls that not only provide excellent boatspeed underway, but promote a more seakindly motion in the rough stuff.

Like its predecessors, this flagship of the Neel fleet also provides scads of accommodation space, as is evident in the fact it includes an entirely separate second interior lounge forward of the saloon, complete with an ever-so-comfy "sea view" sofa. Topside, there's another expansive lounge aft of the boat's elevated twin helm stations, and even room for a dinghy garage aft in the central hull. **Neel Trimarans, neel-trimarans.com**
